Introduction:

Our project explains about the User management Application . This project mainly explains the various actions related to users. This project shows some ease in adding, updating and deleting user details.

Our Project Includes:-

- user Module

I have developed this Application in **Java, JSP, Servlets and MySQL**. It's a web based projects so I have used HTML, CSS , BootStrap also.

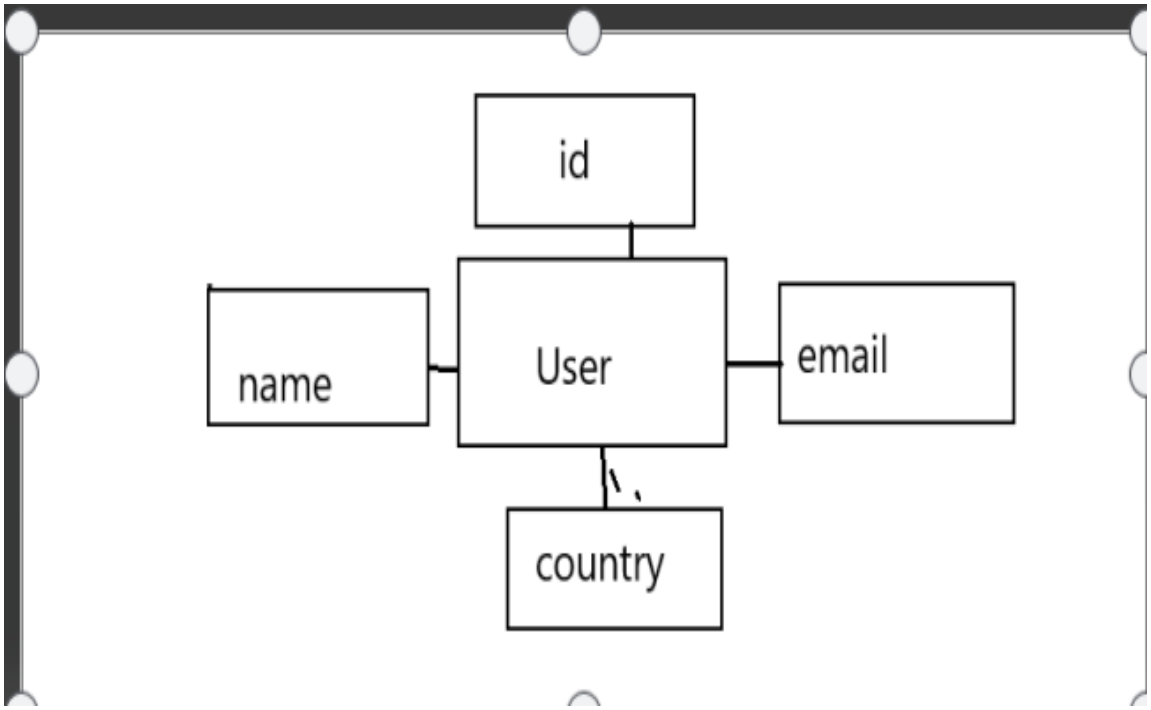
The main feature of the project is to manage the update, delete and edit of the user Application

I create **Curd Operation** where userapplication can add New Record, Update, and Delete and also View their whole records of the User.

Software Requirements:

Front end:	Java/J2EE technologies (Servlet, JSP), HTML, CSS,BootStrap, JDBC.
Back end:	MySQL.
Middleware/Server:	Apache Tomcat v8.5
IDE:	Eclipse IDE for Java EE Developers
Browser:	Best result on Google Chrome
Operating System:	Windows 10

ERD (Entity Relationship Diagram):



id
name
User
email
country

Data Dictionary:

Table name: Demo

```
CREATE TABLE users (
        id INT NOT NULL AUTO_INCREMENT,
        name varchar(25),

         email varchar(25),
        country varchar(25),
        primary key(id
```
